SPRING

2017

**Season:** Year 2017

One day the moon got tired of looking at the Earth and went on a trip. She wanted to know what there was beyond the Earth. She wanted to find out about that red planet she could see in the distance, and discover what was at the edges of the galaxy. Go adventuring with the moon and find out about the planets in our solar system, their colours, shapes, sizes, behaviour and stars. Travel through the skies and explore the universe that surrounds us. Space was never so much fun.
